EDUCATION

Maulana Azad National Institute of Technology, Bhopal	2019 – 2024
B.Tech in Computer Science	CGPA: 7.27
Kendriya Vidyalaya ITBP, Shivpuri (CBSE)	2019
Class XII	Percentage: 93.2%

EXPERIENCE

Associate Engineer (Backend)	Aug 2025 – Present
Arive	
- Optimized backend pricing workflows using a rule-engine architecture, reducing execution latency by 30% across critical services. - Built scalable backend features supporting 30+ financial institutions and 1,000+ brokers, improving transaction reliability and lender-broker operations. - Automated generation of complex housing rule profiles using AI-driven workflows, reducing configuration time from 2–3 hours to ~10 minutes (92%+ reduction). - Refined and validated AI-generated outputs, increasing rule accuracy and reducing manual engineering effort for pricing configurations. Tech Stack: NestJS, Node.js, JavaScript, Docker, AWS, ORM, REST APIs.	

PROJECTS

SahiPlot - Real Estate Listing Platform	Apr 2026
Live	
- Built a scalable real estate platform for listing and discovering land properties. - Designed and developed RESTful APIs using Spring Boot for property listings, search, and user management. - Deployed backend on AWS EC2 using Docker, enabling consistent and efficient deployments. - Configured Amazon RDS (PostgreSQL) with private access and secure EC2 connectivity. - Integrated AWS S3 for image storage with structured bucket strategy and IAM-based access control. - Implemented Nginx reverse proxy with SSL to enable secure HTTPS access. Tech Stack: Java, Spring Boot, PostgreSQL, AWS (EC2, S3, RDS, IAM), Docker, Nginx	
ChatLyst - Real-Time Messaging Platform	Mar 2025
Source Code	
- Built a scalable real-time messaging system using WebSockets, supporting persistent chat and low-latency communication. - Integrated Google OAuth2 authentication with secure session handling. - Designed backend APIs using Spring Boot with efficient database interactions. Tech Stack: Spring Boot, React, WebSocket, MySQL, TypeScript.	
Spam-Span - Spam Detection System	Jan 2025
Source Code	
- Developed a Truecaller-like spam detection system with JWT-based authentication and contact management. - Optimized database queries and indexing, improving response time for lookup operations. - Designed RESTful APIs in Golang for high-performance request handling. Tech Stack: Golang, Gin, JWT, GORM, SQLite.	

TECHNICAL SKILLS

Languages: C++, Java, JavaScript, Go
Backend: Node.js, NestJS, Spring Boot, Golang
Frontend: React, Redux
Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, REST APIs, System Design Basics

ACHIEVEMENTS

- Solved **600+ problems** across LeetCode, Codeforces, and GeeksforGeeks.
- Strong foundation in **Data Structures and Algorithms**, focusing on problem-solving and optimization.
- 1st Runner-Up in Nukkad Naatak Competition at NIT Nagpur.
